

THU TA AUNG MYO

NETWORK ENGINEER

Network Engineer with 1 year of experience in configuration, troubleshooting, and support across Ruijie, Fortinet, and MikroTik platforms. Experienced in public Wi-Fi deployment. Team player with strong communication skills and a commitment to continuous learning.

WORK EXPERIENCE

Protocol Solutions

Junior Network Engineer

07/2026 - PRESENT

- Network installation, configuration, and maintenance of routers, switches, firewalls, and APs
- Remote network monitoring and management using Ruijie Cloud
- LAN/WAN/wireless troubleshooting and network health checks
- Maintained stable connectivity across multiple operational sites
- Collaborated with senior engineers on upgrades, security, and projects
- Created and modified firewall policies and application access rules
- Provided technical support and resolved user network issues

CERTIFICATES

- CCNP Training – Genius Networking Training
07/2026 – Present
- Linux for Administrators – National Cyber City
07/2026 – Present
- Computer A+ – National Cyber City
07/2026 – Present
- Introduction to Networks (ITN) – Cisco Networking Academy
03/2026 – 05/2026
- Cloud Computing Fundamentals – IBM SkillsBuild
01/2026
- Certificate of Completion: CCNA 200-301 – CCNA VCE Training
06/2025 – 02/2026
- MikroTik Certified Network Associate (MTCNA)
07/2025 – 10/2025
- Certificate of Completion: Computer Basics (Microsoft) – KMD
07/2021 – 09/2021
- Business & Essential Employability Skills Certificate – SFUx
06/2021 – 07/2021

NETWORK PROJECTS

Cisco Switch & Router Network Deployment

- Designed and implemented a LAN network using Cisco routers and switches, configuring VLANs, Router-on-a-Stick for inter-VLAN routing, EtherChannel, VoIP services, Port Security, and Access Control Lists (ACLs) to demonstrate network connectivity, performance, and security.

Network Monitoring & Performance Analysis using Zabbix

- Deployed and configured Zabbix on Ubuntu to monitor system and network performance in real time, analyze key metrics, and support troubleshooting and performance improvement.

MikroTik RouterOS Network Lab Project

- Designed and configured a MikroTik RouterOS lab environment, implementing IP addressing, static routing, NAT, DHCP, firewall rules, and wireless network connectivity to demonstrate core networking concepts.

CCNA VCE TRAINING

Feb 12, 2026

Recommendation Letter

Name - Sir Kaung
Position - Founder & Principal
Organization - CCNA VCE TRAINING
Address - 75 Baho Street , Hledan Kamaryut TSP,YGN
Email - sirkaung@ccnavcettraining.com
Phone - 09-776442067

Respected Sir/Madam,

I am writing to highly recommend “Thu Ta Aung Myo” who has recently completed a "CCNA 200-301" course under my supervision at [CCNA VCE TRAINING Network Academy]. Throughout the duration of the course, “Thu Ta Aung Myo” demonstrated exceptional dedication, enthusiasm, and a strong aptitude for networking concepts.

“Thu Ta Aung Myo” actively participated in class discussions, contributed effectively to group projects, and achieved outstanding results in assessments and practical exams. Their dedication, technical proficiency, and interpersonal skills make them well-suited for roles in networking and IT.

I am confident that “Thu Ta Aung Myo” will excel in any networking-related position they pursue. Please feel free to contact me at Phone Call or Email Address for any further information.

Thank you
Yours faithfully,
Sir Kaung
